

Is Your Free Anti Virus Really Good Enough?

Upgrade to Full Security for £22 per year*

Hello,

We have seen a huge rise in the amount of "malware" this year – that's viruses and malicious software – all designed to wreak havoc on your system or steal your data. Some of our customers have been victims of hacking and identity theft – which has been particularly upsetting.

As we head into the Autumn (traditionally a bad time for viruses) we are recommending that our customers upgrade from the free editions of anti virus software to full Internet Security Suites.

Why is it Better?

These suites have firewalls, better malware protection, identity protection and they provide much more protection online and help prevent malicious software being downloaded. No software can offer a 100% guarantee but as threats increase, the more protection you have, the better.

Special Summer Deals

We are offering 2 products - **AVG Internet Security 2011 and Norton Internet Security 2011**. They are top of the rankings for security suites. A 2 year subscription to AVG Internet Security starts at just £22 per year*. Full pricing is in the column to the right.

Book Your Upgrade Now

Don't leave it to chance. We are taking bookings for early September. To order your Security Suite, call us on 01803 834377 or email heather@dartmouthcomputing.com.

With regards,
Heather
